

Passage Guardian

Global Yacht Monitoring by Peter Mott

"We were so lucky to have had Peter 'onboard' for our latest passage from Fiji to New Zealand, in highly unpredictable spring weather.

Knowing that Peter was watching over us helped me keep my sanity amongst three preschool aged children, and a husband who is new to bluewater sailing."

Anni Kurse - SV LUNA C

Satellite AIS Tracking

automatic alerts if your vessel stops making way or stops reporting in.

Checks Your Awareness

alerts for heavy weather ahead, particularly when approaching the coast, and notifies traffic expected to cross your track overnight.

When You Are Stressed

an experienced, calm & friendly voice on the end of the HF / SSB radio or satellite phone to help you through challenging situations.

Rescue Coordination Centre Notification

when there is no time to activate an EPIRB or initiate a distress call, or when I suspect you may be in trouble.

Passage Guardian requires AIS and Email At Sea. HF / SSB radio optional.
